Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1755

Claims 12-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 19 December 2005.

Claims 1-11 remain under consideration.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1-11 fail to set forth the basis upon which the percentages set forth are expressed. (e.g. mole%, weight%, volume%). Useful comparison with the prior art is impossible.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. One of ordinary skill in the art is not taught how to make the invention commensurate with the instant claims. The instant claims recite ingredients the maximum amount of which do not add up to 100%. There is no specific disclosure what the balance of the composition may be. The instant specification provides only few examples of which ingredients are to be mixed to be formed into the claimed coating material upon incineration (sintering?). There is no disclosure of structure of the coating material after incineration that is the subject of

Art Unit: 1755

the instant claims. There is no disclosure of the temperature or other conditions at which the incineration is to take place. One of ordinary skill in the art is not taught how to formulate the starting materials, "incinerate" the composition to obtain the material of the instant claims or even properly perform the analysis of the incinerated material with anything resembling a reasonable expectation of success. Further, the instant 1-5, 10 and 11 are not limited to the material in an incinerated state as required by the instant specification.
